

Mr. Silluzio
AP Biology Lesson Plan
Date:

Topic: Transcription of Genes

Summary: This lesson combines whole class instruction with an exercise designed to help students review sophomore level gene transcription.

Goals/Objectives:

- **Understand that gene transcription is facilitated by specific proteins.**
- **Understand that gene transcription describes the process by which encoding portions of DNA are copied to RNA.**

Standards:

[Corresponding Curriculum](#)

Time Required: 1 80 minute period

Prerequisite Knowledge:

Sophomore level understanding of gene transcription.

Homework: Students are required to read chapter 14.

Accommodations:

Notes, resources and enrichment material are available on a class webpage.
